

Medicines and medical appliances are not taxed at the normal rate of 6.25%. These items are taxed at a lower rate of 1%. See 86 Ill. Adm. Code 130.310. (This is a GIL.)

December 14, 1998

Dear Mr. Xxxxx:

This letter is in response to your letter dated September 14, 1998. The nature of your letter and the information you have provided require that we respond with a General Information Letter which is designed to provide general information, is not a statement of Department policy and is not binding on the Department. See 86 Ill. Adm. Code 1200.120(b) and (c), enclosed.

In your letter, you have stated and made inquiry as follows:

COMPANY is the nation's largest supplier of PRODUCT. We are located in CITY/STATE. All product is ordered by phone, and we ship via the United States Postal Service or United Parcel Service.

We have recently expanded our product line to include impotence devices. The device must be ordered by a physician's prescription. (I have attached information on the device for your review.)

In order to comply with each state's sales tax rulings, we need to determine if we should be collecting sales tax on the sale of these items. Is an impotency device, when prescribed by a physician, taxable in your state? Please fax your response to my attention at ####.

Thank you in advance for your prompt reply.

All gross receipts from sales of tangible personal property in Illinois are subject to Retailers' Occupation Tax unless an exemption is specifically provided.

Medicines and medical appliances are not taxed at the normal rate of 6.25%. These items are taxed at a lower rate of 1%. See the enclosed copy of 86 Ill. Adm. Code 130.310. Items subject to this lower tax rate include prescription and nonprescription medicines, drugs, medical appliances, and insulin, urine testing utensils, syringes, and needles used by diabetics, for human use.

A medicine or drug is defined as any pill, powder, potion, salve, or other preparation intended by the manufacturer for human use and which purports on the label to have medicinal qualities.

A medical appliance is defined as an item which is intended by its manufacturer for use in directly substituting for a malfunctioning part of the body. See part (c) of Section 130.310. Medical devices that are used for diagnostic or treatment purposes do not qualify for the lower tax rate.

In general, in order to qualify as a medical appliance, the product must directly substitute for a malfunctioning part of the body. Some of the products specifically listed in the regulation as qualifying for the reduced rate are home glucose monitors, home blood glucose test strips and related supplies used to treat human diabetes. Other products that directly substitute for a malfunctioning part of the body include urological catheters, leg bags, ostomy pouches and drain bags, and mastectomy prosthetic devices such as forms and bras. Generally, vacuum erection devices qualify as medical appliances and are eligible for the low rate of tax.

Please note that supplies, such as non-sterile cotton swabs, disposable diapers, toilet paper, tissues and towelettes and cosmetics, such as lipsticks, perfume and hair tonics do not qualify for the reduced rate. Sterile dressings, bandages and gauze do qualify for the reduced rate.

I hope this information is helpful. The Department of Revenue maintains a Web site which can be accessed at www.revenue.state.il.us. If you have further questions related to the Illinois sales tax laws, please contact the Department's Taxpayer Information Division at (217) 782-3336.

If you are not under audit and you wish to obtain a binding Private Letter Ruling regarding your factual situation, please submit all of the information set out in items 1 through 8 of the enclosed copy of Section 1200.110(b).

Very truly yours,

Melanie A. Jarvis
